EXFOLIATING BODY CREAM

Active scrubbing
Repairing & Nourishing

Your skin is your hidden treasure and evolves at the rhythm of your life; gently caring for it will allow you to feel (almost!) perfect and even more radiant.

We entrust you with our confidential recipe with a delicate fragrance. It is composed of innovative active natural ingredients, of Toulouse Symbiolette® Violets (collagen booster), organic glycerine, organic honey and organic apricot kernels.

It is suitable for all skin types, even sensitive skin.

This exfoliating cream promotes cell renewal by removing impurities. It smooths your skin and leaves a silky veil with a delicate fragrance. It provides optimum body moisturising.

Much love has gone into our eco-responsible scientific research.

The violets at the heart of this cream are hand-cultivated in our Toulouse gardens, the water comes from the Pyrenees and 95% of our ingredients are of natural origin. Our products are carefully formulated and packaged in the Occitan region, in the south of France.

Our precious products created just for you, are contained with sugar cane tubes and recycled cardboard printed with vegetable inks.

Because it all starts with family history.

The Violette de Toulouse has unique properties that were still unknown until today. Our passion and desire to share its secrets have brought us to you ... We have been cultivating the traditional Toulouse Violet for more than 30 years, and with the expertise of French craftsmanship, have created these rich and generous products with Violet at their heart. Fragile, airy, rare and authentic, it holds exceptional dermatological virtues that we have investigated over more than seven years of scientific research. We have the great pleasure of passing on its benefits to you.

Use

Once or twice a week, moisten your skin and apply the exfoliating cream all over your body in circular motions. Rinse thoroughly and dry gently. Complete this ritual by applying the body cream.

Suitable for all skin types.
